

Joseph Akujieze

Full-Stack Web Developer | +2348107758329 | akujiezejoseph@gmail.com

GitHub: github.com/josephdev934

PROFESSIONAL SUMMARY

Full-Stack web developer experienced in building modern business websites, dashboards, and e-commerce applications using JavaScript technologies. Skilled in backend development, API integration, payment system integration, and responsive frontend development with React and Next.js. Passionate about building scalable applications and continuously improving software engineering skills through practical GitHub projects.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Development

Databases: MongoDB, PostgreSQL, Supabase

Integrations & Tools: Paystack API, Git, GitHub, Authentication & Authorization

Concepts: Web Application Architecture, CRUD Operations, API Integration, Version Control

PROJECT EXPERIENCE

Luxe - E-Commerce Clothing Store

Tech Stack: Node.js | Express.js | React | Supabase | Paystack API

Live Project: <https://luxe14.netlify.app/>

- Developed an e-commerce web application for selling clothing products.
- Integrated Paystack payment gateway for secure online transactions.
- Implemented backend logic for product management and order processing.
- Designed responsive user interfaces focused on usability and customer experience.
- Applied RESTful routing and structured backend architecture.

Heaven Lines - Interior Agency Website

Tech Stack: React | Tailwind CSS

Live Project: <https://heavenlines.netlify.app/>

- Designed and developed a responsive website for an interior design agency.
- Built modern UI layouts emphasizing branding and visual presentation.
- Implemented mobile-first responsive design principles.
- Structured content to showcase company services and portfolio professionally.

Web1Crypto Dashboard - Cryptocurrency Analytics Dashboard

Tech Stack: Next.js | APIs | Chart Integration

Live Project: <https://cryptodas.netlify.app/>

- Built a cryptocurrency dashboard displaying live market data using external APIs.
- Implemented dynamic chart visualization for monitoring price trends.
- Developed interactive components for real-time data updates.
- Applied asynchronous JavaScript for API data handling.

EDUCATION

B.Sc Computer Science (In View)

University of JOS, Nigeria

Relevant Coursework: Programming Fundamentals, Web Development, Data Structures

ADDITIONAL INFORMATION

- Active GitHub developer building real-world web applications.
- Strong interest in backend engineering and fintech integrations.
- Continuously learning React, Next.js, and PostgreSQL.
